

# LOGOUPDATE

BECAUSE INNOVATION IS ALWAYS AHEAD OF ITS TIME

## PETRONAS AND LOGOPLASTE ARE WORKING TOGETHER TO HELP REDUCE CO<sub>2</sub> EMISSIONS AND DELIVER SUSTAINABLE PACKAGING

Logoplaste's new client, PETRONAS, has adopted our W2W\* business model taking advantage of the sustainable benefits it brings. As neighboring sites, bottles flow directly from production into the filling lines, **this translates into savings of 10 tons of CO<sub>2</sub> emissions per year** as circulating trucks are eliminated.

But that is not all. The EBM multilayer technology enables the use of recycled content. The expected **reduction in the consumption of virgin resin is of 750 tons per year**.

The new packaging combines a sustainable design, with superior performance, and gains in production efficiency. Value is created throughout the entire supply chain.

A new standard in lubricant packaging.

### WE DELIVER MINDFUL PLASTIC PACKAGING SOLUTIONS

LET US HELP

\*W2W wall to wall - Logoplaste sets its production facilities within the clients', providing a seamless supply from bottle production to filling lines. The most sustainable business model in the industry
