BECAUSE INNOVATION IS ALWAYS AHEAD OF ITS TIME

Fulfilling our commitments

INCREASING RECYCLED CONTENT

SUNTORY
BEVERAGE & FOOD GB&

100% recycled plastic and 100% bottle-to-bottle recyclable
RIBENA 500 ML BOTTLE

40% INCREASE IN RECYCLED CONTENT
2020 vs 2019

Logoplaste, alongside our clients, has been using recycled raw materials in its products for over 10 years, for food and non-food applications, and a significant portion of our packaging is already produced with 100% recycled content.

Why do we do this?

- It reduces the need for virgin, fossil-based raw materials
- It saves energy
- It diverts waste from landfills

Our efforts are aligned with the New Plastics Economy Global Commitment and we are on our way to reach our target.

We are determined in **producing sustainable packaging** with materials that can be **recycled** and have well-established **recycling streams**, so that waste isn't actually waste, but becomes a valuable resource.

[read all about it](#)

Logoplaste is among the first members to sign the New Plastics Economy Global Commitment in 2018
