

OUR WASTE POLICY

GENERAL REQUIREMENTS

Logoplaste is committed to protecting the environment by implementing an effective waste management program that meets legislative and regulatory requirements. Therefore, we will endeavor to prevent or reduce waste through process improvements, technology, and raw materials sourcing.

The waste hierarchy shall be applied at all sites to ensure our environmental impact is continually reduced.

SPECIFIC REQUIREMENTS

- Our plants, equipment, and processes will be suitably maintained to maximize efficiencies and reduce waste
- Waste from any Logoplaste site will not be landfilled or incinerated on-site. This practice is strictly forbidden
- Clearly labelled waste containers will be provided in offices, welfare facilities and departments to help collect and segregate waste cardboard, plastics, metal, and paper for correct disposal
- Employees, contractors, and visitors will be provided with training, information, and the correct containers to encourage recycling to aid in proper disposal
- All our sites will have complete visibility of the waste generated by the site and disposal methods. This includes waste removed from the site by an approved contractor and collected by the property owner/business owners
- We will not send our waste to countries with limited infrastructure to reuse, recycle or correctly manage and dispose of our waste
- We will only use authorized waste contractors to guarantee safe and efficient waste removal and subsequent processing
- If we become aware that our waste has been incorrectly disposed of, or managed, we will collaborate with the local authorities to aid in the containment and clean-up. We will refrain from using the waste contractor
- Sites will keep records of all hazardous waste transfers. The plant will use this information to check the amount of waste produced and how and where it is disposed of

HAZARDOUS WASTE

Lubricants, fuels, solvents, adhesives, glass, treated water (biocides)

- Stored in segregated and secure containers
- Spill-containment materials will be present
- Records of all waste transfers, with quantities, shall be kept

NON-HAZARDOUS WASTE

Plastic, cardboard, paper, canteen waste

- All plants will make every effort to ensure plastic process waste (i.e., purge, preforms, bottles etc.) is continually reduced and recycled

ELECTRICAL WASTE

Motors, laptops, PC, PLC

- Hard drives are to be removed or damaged
- Power leads are to be cut off
- Consult with IT Department to promote charitable donations

METAL WASTE

Pumps, filters, consumable parts, metal parts

- Not to be given to anyone offering a "roadside" type collection
- Ladders & lifting equipment shall be modified to ensure no one else can use them

MONITORING COMPLIANCE

1. This policy will be continually audited and inspected to ensure compliance with this policy and legal compliance.
2. Waste generated by the sites shall be reported and monitored to drive continuous improvement

Gerardo Chiaia
Logoplaste Chief Executive Officer
